

ISO 27001:2022

INFORMATION SECURITY MANAGEMENT SYSTEMS

Course Description:

This 2-day ISO 27001 Internal Auditor Training is designed to equip participants with the knowledge and skills required to effectively audit an Information Security Management System (ISMS) based on the ISO 27001 and ISO 19011:2018 standards. The course includes a comprehensive overview of ISO 27001 requirements, audit techniques, and best practices to ensure the successful implementation and maintenance of an ISMS.

Benefits:

- Gain a deep understanding of ISO 27001 and the internal audit process.
- Enhance auditing skills and techniques.
- Contribute to the continual improvement of organization's Information Security Management System.

Assessment:

A written examination and practical assessment will be conducted to evaluate participants' understanding and application of the ISO Management Systems auditing concepts.

WHAT WILL YOU LEARN:

- Introduction to ISO 27001 and the ISMS framework.
- Understanding information security management principles.
- Overview of ISO 27001 requirements and clauses.
- Introduction to the internal audit process.
- Roles and responsibilities of an internal auditor.
- Planning an internal audit of the ISMS.
- Conducting an internal audit: Techniques and best practices.
- Reporting and communicating audit findings.
- Corrective actions and follow-up.
- Case studies and practical exercises.

UPON COMPLETION, YOU WILL BE ABLE TO:

Understand the principles and requirements of ISO 27001.

Apply audit principles, practices, and techniques in accordance with ISO 19011.

Plan, conduct, report, and follow up on internal audits of an ISMS.

WHO SHOULD ATTEND:

- Information security managers and professionals
- Internal auditors
- IT managers
- Risk managers
- Compliance officers
- Quality managers
- Anyone involved in the implementation or maintenance of an ISMS

CERTIFICATION:

Participants who successfully complete the course and pass the assessment will receive a Certificate of Achievement as Internal Auditor.

COURSE FEE INCLUDES:

- Certificate of Attendance / Achievement
- Training materials
- Examination fee

REGISTRATION:

RM 864.00

COURSE OUTLINE

DESCRIPTION

ISO/IEC 27001:2022 was established to provide requirements for establishing, implementing, maintaining and continually improving an information security management system. The adoption of an information security management system is a strategic decision for an organization. The establishment and implementation of an organization's information security management system is influenced by the organization's needs and objectives, security requirements, the organizational processes used and the size and structure of the organization. All of these influencing factors are expected to change over time.

The information security management system preserves the confidentiality, integrity and availability of information by applying a risk management process and gives confidence to interested parties that risks are adequately managed. It is important that the information security management system is part of and integrated with the organization's processes and overall management structure and that information security is considered in the design of processes, information systems, and controls. It is expected that an information security management system implementation will be scaled in accordance with the needs of the organization.

An internal audit one of the core process in contributing towards effective implementation of ISO/IEC 27001:2022 at the workplace. Internal audit course in ISO/IEC 27001:2022 will benefit the organization to improve their Information Security performance by developing the necessary skills to assess and report on the conformance and implementation of processes based on ISO/IEC 27001:2022 requirement.

The participants will learn how to initiate an audit, prepare and conduct audit activities, compile and distribute audit reports and complete follow-up activities.

OBJECTIVES

- To understand the fundamentals of ISO/IEC 27001:2022 (ISMS) & performing evaluation based on ISO/IEC 27001:2022 (ISMS) requirements
