

ISO 39001:2012

ROAD TRAFFIC SAFETY MANAGEMENT SYSTEMS

Course Description:

This one-day training program is designed to provide participants with a comprehensive understanding of ISO 39001, the international standard for road traffic safety management systems. Participants will gain insights into the principles, requirements, and benefits of ISO 39001, equipping them with the knowledge to contribute to the implementation and maintenance of a road traffic safety management system in their organizations.

Benefits:

- Understand the importance of road traffic safety management.
- Gain knowledge of the ISO 39001 standard and its application.
- Contribute to the development and improvement of road traffic safety policies.
- Enhance organizational resilience and reduce the risk of road traffic accidents.
- Improve compliance with legal and regulatory requirements.
- Enhance the organization's reputation and stakeholder confidence.

WHAT WILL YOU LEARN:

1. Overview of Road Traffic Safety Management

- Importance of road traffic safety
- Global road safety challenges
- Overview of ISO 39001

2. Understanding ISO 39001 Requirements

- Structure and components of the standard
- Requirements for policy and leadership
- Risk assessment and treatment
- Planning and implementation of measures
- Performance evaluation and improvement

3. Benefits of Implementing ISO 39001

- Operational and financial benefits
- Legal and regulatory compliance
- Stakeholder and community engagement

CERTIFICATION:

Participants who successfully complete the course Certificate of Attendance.

COURSE FEE INCLUDES:

- Certificate of Attendance
- Training materials

REGISTRATION:

RM 378.00

*Contact us for Inhouse Training quotation.

UPON COMPLETION, YOU WILL BE ABLE TO:

Understand the fundamental concepts of road traffic safety management.

Familiarize with the structure and requirements of ISO 39001.

Identify the benefits of implementing ISO 39001 for their organization.

Recognize the roles and responsibilities within a road traffic safety management system.

Comprehend the process of planning, implementing, and maintaining an ISO 39001-compliant system.

Understand the importance of continual improvement in road traffic safety.

COURSE OUTLINE

DESCRIPTION

This course provides participants with a comprehensive understanding of the ISO 39001:2012 standard, focusing on the clause requirements. Participants will gain insights into the principles, concepts, and best practices associated with Road Traffic Safety Management Systems (RTSMS). Through interactive sessions and case studies, participants will learn how to understand and apply the standard to enhance road traffic safety within their organizations.

OBJECTIVES

- Understand the fundamental concepts and principles of ISO 39001:2012 and its relevance to road traffic safety management.
- Familiarize with the requirements of ISO 39001:2012 and their implications for implementing an effective Road Traffic Safety Management System.
- Gain practical insights and skills to initiate, maintain, and improve road traffic safety practices in alignment with ISO 39001:2012.

TOPICS

- **Introduction to ISO 39001:2012**
 - Overview of ISO standards and their significance in road traffic safety management
 - Understanding road traffic safety hazards and risks
 - Importance of a systematic approach to road traffic safety management
- **Clause 4: Context of the Organization**
 - Identifying internal and external issues relevant to road traffic safety
- **Clause 5: Leadership**
 - Roles and responsibilities of top management in promoting road traffic safety
 - Developing road traffic safety policies and objectives
- **Clause 6: Planning**
 - Risk assessment and risk treatment strategies for road traffic safety
 - Setting measurable objectives and action plans
- **Clause 7: Support**
 - Resource management for road traffic safety initiatives
 - Competence, awareness, and communication requirements
- **Clause 8: Operation**
 - Implementing operational controls to ensure road traffic safety
 - Emergency preparedness and response procedures
- **Clause 9: Performance Evaluation**
 - Monitoring, measurement, analysis, and evaluation of road traffic safety performance
 - Internal audit and management review processes
- **Clause 10: Improvement**
 - Continual improvement principles and practices
