

ISO 39001:2012

ROAD TRAFFIC SAFETY MANAGEMENT SYSTEMS

Course Description:

This comprehensive 2-day training program is designed to equip participants with the knowledge and skills necessary to interpret and implement ISO 39001, the international standard for road traffic safety management systems. The course will cover key concepts, requirements, and best practices for effective implementation, ensuring participants gain a deep understanding of how to enhance road traffic safety within their organizations.

Benefits:

- **Gain In-Depth Knowledge:** Develop a thorough understanding of ISO 39001, its principles, and its application in the context of road traffic safety management systems.
- **Enhance Organizational Safety:** Acquire the tools and insights needed to implement ISO 39001 effectively, leading to improved road traffic safety performance within your organization.
- **Compliance Assurance:** Learn how to align your organization with international best practices, ensuring compliance with ISO 39001 standards and regulations.
- **Risk Reduction:** Identify and mitigate risks associated with road traffic safety, fostering a safer working environment for employees and the public.
- **Continuous Improvement:** Implement a framework for continuous improvement, enabling your organization to adapt to changing road safety challenges and opportunities.

WHAT WILL YOU LEARN:

- **Introduction to ISO 39001:** Overview of the standard, its purpose, and its significance in road traffic safety.
- **Key Requirements of ISO 39001:** A detailed examination of the standard's requirements and how to implement them effectively.
- **Practical Implementation Strategies:** Real-world strategies for implementing ISO 39001 within diverse organizational contexts.
- **Case Studies and Best Practices:** Analysis of real-world case studies and best practices to enhance learning through practical examples.

UPON COMPLETION, YOU WILL BE ABLE TO:

Understand the key elements and requirements of ISO 39001 for road traffic safety management systems.

Learn how to apply ISO 39001 principles within your organization, from policy development to performance evaluation.

Identify potential risks related to road traffic safety and develop strategies to mitigate them effectively.

WHO SHOULD ATTEND:

- Safety Managers
- Quality Assurance Professionals
- Transportation and Fleet Managers
- Compliance Officers
- Risk Management Professionals
- Anyone responsible for implementing and maintaining road traffic safety within their organization.

CERTIFICATION:

Participants who successfully complete the course Certificate of Attendance.

COURSE FEE INCLUDES:

- Certificate of Attendance
- Training materials

REGISTRATION:

RM 864.00

COURSE OUTLINE

DESCRIPTION

Road traffic safety (RTS) is a global concern. It is estimated that around 1,3 million people are killed and 20 million to 50 million are injured on roads around the world each year, and that this level is rising. The socio-economic and health impacts are substantial.

ISO 39001:2012 provides a tool to help organizations reduce, and ultimately eliminate, the incidence and risk of death and serious injury related to road traffic crashes. This focus can result in a more cost-effective use of the road traffic system.

OBJECTIVES

- To demonstrate requirements of ISO 39001:2012.
- To identify, assess and produced documented risk assessment based on operational activities as per required by ISO 39001:2012.
- To identify and system elements and activities that are effective for managing road traffic risks and controlling losses and which provide a basis for continuous improvement.
- To demonstrate how to apply professional management principles and techniques to design, develop and implement comprehensive road traffic safety management system.

TOPICS

- Introduction to RTSMS standard
- Introduction of High-Level Structure for RTSMS
- Details (clause by clause) for the following clauses and requirements:
 - Scope
 - Terms and Definitions
 - Context Of Organization
 - Leadership and Worker Participation
 - Planning
 - Support
 - Operation
 - Performance Evaluation
 - Improvement
